

**UMass Amherst Student Response to Discussion/Lab Section Instruction  
FALL 2022 OPEN-ENDED RESPONSES**

Course: STATISTC 240 [REDACTED]  
Instructor: Sarsani, Vishal Kumar

<b>What aspects of the section leader's teaching were most helpful to you?</b>	<b>What suggestions do you have for how the section leader could improve the learning experience for you?</b>
He was always open to questions. He also spent more time on complex topics and definitions, while gliding over the number crunching which was less important to understanding statistics.	I thought this sections was run well, and I see no glaring issues with his style of teaching.
Just going over the materials and the worksheets was helpful. Also the slideshows before the exams were very helpful	n/a
He explained things step by step. Provided good notes and was always welcoming of any question. Willing to always help students and a quick replier.	N/A
He had slides with the discussion section's notes and it was really helpful to have it there.	There's a board on the side that's difficult to see on the opposite side of the room, so maybe just using the main board will be better for everyone.
I thought that he organized our time well by breaking down each of the most important questions on the worksheets.	The learning experience could be improved if the section leader graded material more quickly.
Vishal was genuinely the best TA I've had. He explained every topic perfectly and I always counted on the discussions to understand the material.	No suggestions, it was perfect.
I liked how he wrote out all steps for solving any given problem. It was also done in a manner that was easy to understand and follow. I thought that Vishal was a very good TA and I learned a lot more from the discussion than a lecture.	Maybe going over the quizzes at some point so that we can understand our mistakes
I found that Vishal was an expert at getting to the point. Especially in a short discussion, there is nothing worse than a TA that talks in circles, but Vishal's style of teaching meant that students always understood the topics that were going to be on the quiz quickly.	There's really not much that I can think of here except for some lessons the lecture portion was a bit too fast paced for the material that was covered, but I understand how difficult the time constraint is.
vishal was very helpful in class, open to answering questions, and would always respond to emails quickly	
I like how he explains things very well and comes to discussion prepared with a presentation	I think his discussions don't need to change
Def's the explanations and notes that he always gave were very helpful	No comment
His powwerpoints	
His examples were very straight forward and easy to understand and follow. Really great and knowledgable TA	n/a

You may comment about any issue you wish, but we would appreciate your covering at least the following items: General organization of the discussion section, clarity of explanation and general helpfulness of your TA, availability of your TA during office hours and by appointment.

Extremely helpful:

- covering/reviewing what was taught in the lecture (refreshes memory and helps to "stick" the material in my mind)
- example questions/worksheet (doing example problems helps to solidify the steps and concepts)

Helpful:

- quizzes (tests my personal understanding of the material)
- office hours was nice

General Organization, how it was structured worked well with me. Having the quizzes come after the reviewing and worksheet was really nice since if we had questions we could ask prior to the quiz. The clarity of the explanations was good if you paid attention. The general helpfulness:

→ maybe have clearer handwriting

I thought the slides used in the discussion section were very helpful. I also liked going over the notes from last class, then doing the practice problems, and then finally the quiz. The practice problems and the quizzes helped me understand what was taught in class better. My TA was very helpful during section and office hours. Even though I couldn't go to most office hours he always answered my emails the same day with a clear and thoughtful explanation. I feel like the discussion section greatly improved how I performed in this class and helped with my understanding of the material.

Things Visal is doing well:

- answers any questions anyone in the discussion <sup>individual</sup>
- generally explains material well enough so that we understand

Things Visal can work on:

- getting the discussion to stop talking and working on the worksheet while he is explaining ~~the~~ the answers

Course Statistics 240 Section

Vishal has been a great help throughout the course - without his discussion, it's very likely I would not have done well in this class. I personally think he is a great instructor, and would say he explains things even better than the professor. Easily one of the best TAs I have ever had the honor of knowing.

Many thanks

§

Best of luck!

Vishal is:

- organized
- very clear in his explanations
- very available
- eager to help

Vishal has been a great TA. He explains the material very well & is always willing to help. However, one thing I would change are the pauses he sometimes takes when going through problems. Sometimes, after we finish one part of a problem, he will pause for 15-30 seconds. This adds up over the course of discussion & I sometimes felt rushed while taking quizzes at the end of class. Eliminating these pauses & lessening the time to individually work on problems could speed up class & leave more time for the quiz. Overall, Vishal has done a great job this semester.

Organization: This discussion was organized quite well & Vishal did a good job of teaching & solidifying material from the week before. I think for student's sake it would be better to relearn material in the same week.

Clarity of

explanation: excellent — my TA should be teaching the class. Vishal gave extremely clear explanations & wouldn't stop until we all understood.

Availability: Vishal responded to all emails & messages promptly & was very flexible with other time commitments.

— Vishal is an excellent TA & person. He genuinely cared about his students & did an excellent job TA'ing this class. No complaints → give this man a Raise.

- TA was very good at giving notes to study from + clarified material from class very well by simplifying course material (Vishal's presentations were very helpful)
- Our TA was really good at answering questions
- Our TA was always available to answer emails + consistent availability during office hours + appointments.
- Our TA was always prepared for discussion
- Our TA was really good at giving us more practice problems + explaining solutions

- overall, I found the discussions to be super helpful in understanding the harder, more abstract concepts.

- our TA was always prepared and the worksheets/review slides he made helped with studying

- Also it was helpful that Vishal was responsive through email, because that ensured that my questions were answered quickly.

- overall, I don't think I would change much, the discussions were more helpful than the lectures.

organization : I liked how Vishal thoughtfully explained ~~the~~ material that we were learning about, and distinguished between review material for exams and new material. I always felt like I was ready for the quizzes due to his explanation.

General : Vishal was extremely helpful with making sure that those who were confused understood the material, and explained it in a pretty straightforward manner. I felt like a lot of my understanding of stats came from this discussion with Vishal compared to the lectures.

I thought that the TA was always very well prepared and taught us clearly. I relied on discussion to clear up my points of confusion during class because it was always very helpful. It was clear how much the TA cared about us learning because of his preparedness and the WSs he would give us for outlines of the information and practice problems. He would frequently send us helpful emails with necessary info or much needed study tools. I am very grateful to the TA because I credit my success in this class to him.

Very Honestly, without discussion I probably would have struggled with understanding fully the stats topics and all its details. Discussion helped clear all misunderstandings from the textbook and class notes. It is also much easier to pay attention during discussion due to the small class size.

Discussion pointed out key concepts & highlighted problems for exams. I would only change discussion time, I wish it was earlier in the day as I get tired after 5/6. TA Vishal is very good at explaining stats topics clearly & simply.

Everything in this discussion section went good.  
Very straight forward in the sense that we would do our work and if we had questions then we could just ask. He always helped us with our work and prepared us for whatever assignments and work was coming. Next year, I think there should be more discussions that aren't first thing in the morning.

I thought the discussion organization was helpful; whenever we had an in-class quiz we'd always review before and I'd feel ready to take the quiz and get a good grade. TA was always helpful when a student asked a question or needed clarity on a topic. And he was always quick to respond when emailed about something. One thing though is maybe the discussions should be longer since we've run out of time sometimes.

I thought that the TA for my discussion was very helpful in explaining areas of confusion in class, especially by going through practice problems like we would be tested on.

The discussion was always organized and the TA always was prepared to teach. But, when we would have quizzes, we would take them in the last few minutes of class, being rushed and normally going past class time. I thought it was extremely beneficial when he would provide us with a summary sheet of concepts, rules or procedures that relate to the chapters we are covering.

Discussions were extremely helpful, & necessary!

Discussions are where I learned the most as I was forced to be engaged in worksheets and learn material for a deadline (test at end).

I was able to ask clarifying questions I didn't ask in class due to smaller class size available.

~~Quizzes were not important~~

Quizzes could get thrown out but they were simple enough to serve a purpose, without hurting grades.

~~One thing I would change is~~

Organization: This discussion section was pretty organized, we got some of our quizzes back a little late, but other than that, we came in and very efficiently got what we needed to do, done.

Explanation clarity: Vishal explained everything extremely well and was always more than willing to offer further explanations or clarifications for us whenever we needed. I found that generally learned the most in discussion.

Helpfulness of TA: Vishal was extremely helpful. Always there to explain things and to help us. He is extremely accommodating and understanding. He wanted to see us do well! Best TA I've had! Slides were very helpful!

Availability of TA: Vishal is always available during his office hours + opt times and if for some reason he won't be, he always makes sure to let us know + offer alternative times.

I believe that the general organization of the discussions were helpful in understanding material more in depth. In class, sometimes some concepts are not as well explained or sometimes I didn't understand the concepts. The discussions really helped with bringing more understanding and clarity to concepts. I was also able to ask more questions. In terms of our TA, he was very helpful in answering questions and was able to guide us through the course. He was able to also help outside of class by sending us emails which was great!

TA helps a lot to support the lecture. He always go over worksheets very specifically and explain to students patiently. He always provide review slides or study guide to <sup>students</sup> ~~students~~, which are very helpful and detailed. The only thing I hope he may improve is to slow down when explaining a problem so that students can follow and write down the solutions.

VISHAL was great.

Did a very good job of explaining things that we didn't understand.

Evident that he cared about helping us get good grade.

This discussion section was generally very helpful in cementing my knowledge of lecture's information. I think that the Quizzes allowed me to work on the material in detail and my TA was incredibly helpful (especially through email with study guides etc.).

★ ★ The section is pretty organized generally. He has  
★ worksheets and slides to go over. These were helpful  
in explanation and understanding. He answered  
questions w/out too much difficulty and make them  
pretty easy to understand. I never went to office  
hours so I don't know how available he is,  
but he answered emails quickly so  
he was available that way.

I thought my TA did a great job. We always had helpful worksheets and went through them step by step in class. He was always sending emails about things that could help us study. He was very approachable and always cleared things up for me when I asked. Sometimes his handwriting was hard to read but I honestly thought he was a great TA.

#### Organization

1. Quick overview → a bit fast pace but understandable as long as you have some knowledge from reading
2. Problems → a bit fast pace but students frequently ask questions and the TA is ready to answer
3. Quiz

#### Clarity

- Sometimes confusing but make sense

#### Helpfulness

- I do learn a lot ~~in the class~~ during the discussion

Overall the discussion was taught pretty well and information needed for the week was always taught. However, sometimes it was extremely difficult to read Vishal's notes on the board which made taking notes and understanding what he was teaching much harder and frustrating. But Vishal was good about office hours and was helpful/understanding in regards to making up quizzes and getting help when needed.

• I think the discussion section was helpful but felt rushed at times, because we had to quickly go over material before taking a Quiz.

I think taking the quizzes helped, because I was studying the material before the exam and got practice so I knew what I was doing for the exam. My TA did help go over information and simplified it for us. He made great powerpoints with the material.

The TA did a great job responding to emails and being very helpful with answering questions and concerns I had.

The organization of the discussion was pretty good. Always had worksheets available and extras for anyone who needed and one from the previous week. He gave us plenty of time to work and always went over every problem. His slides were helpful and had the basic info. needed to complete the problems.

My only complaint was that he gave us more time than we needed to do the worksheets and not enough time to go over it. He quickly went through everything and at times seemed like he was rushing even though there wasn't a need to.

Vishal is very nice and gave us good feedback / advice to apply to our final project. The discussion was very fast paced and often left me confused but I think that is just because math is hard for me and there is a lot of material to cover in a 50 minute period. I could have used more repetitive practice problems but I understand the time constraint.

I really like discussion. It is very nice to come to discussion where the TA goes over the material more in depth. I wish there weren't quizzes which distract away from time spent on discussion topic / material in class. It is quite hard when it is created in the last minute when it could be used to go over more stuff.

Vishal was very helpful with explaining things, with helpful hints & study guides. He wants us to do well. The way we go over things is good. I wish there was more teamwork involved though. Vishal clarified a lot of confusing stuff in class.

I thought handing out the slides through email before exams were really helpful.

In my opinion, the discussion classes were pretty organized and easy to follow. I believe what could be added in the discussions is to go over any problems, as a class, that we got wrong on the exams. This is only if time permits it!

The discussion was very helpful because we went through specific examples and really practiced the material. The way the TA taught was helpful and the Powerpoint slides were a great study tool.

Discussion section was organized well, though sometimes focused a little too much on theory discussed in class and not enough on practice problems  
TA explained concepts very well one-on-one and to class

TA was extremely helpful in completing homework, very prompt replies and specific feedback to questions

Overall, TA greatly enhanced learning from this class. Probability I would experience this much learning from a <sup>substandard</sup> <sub>or standard</sub> TA is  $Z = -3$  area 0.003, highly unlikely

→ Sometimes wished we could have done more examples instead of getting so much time to do the questions ourselves.

He always answered questions that I had. Sometimes explanations were given very fast and it was hard to read writing, but if you asked for clarification he'd give it.

→ Always available if I needed anything

- Discussions were very organized. Sometimes we ran out of time so we didn't get to do some of the material for in class work. Very good use of time though.
- All explanations brought more insight and understanding for learning material.
- Vishal was incredibly helpful for this class. He always checked to make sure we were all understanding what he was saying.
- Always able to reach Vishal by email or other means.

The discussion section was very helpful in my overall understanding of the material learned in class. The quizzes helped me prepare for the exam in advance and keep up to date with the material. The TA taught the material in a very clear and concise manner and the discussion part of the class was overall very helpful in my overall understanding of the material.

I liked the organization of the discussion section and found discussion to be helpful in clarifying topics learned in class in a concise way. I liked how we reviewed the material first and then applied it to practice problems. I did not need to see the TA during office hours/appointment so I cannot comment. Overall, I found discussions very helpful.

I wish the TA covered every question of the worksheets in class or at least gave out answer keys to them at the end with work. There is often little time for the quizzes at the end so we end up staying 10 minutes later than scheduled. The TA is always available during office hours and by appointment. I especially like how quickly my emails are answered, Thank you! The slides posted on the projector are very helpful. I wish we got a copy of these instead of having to take pictures of them on my phone.

I think the way our discussion was held was very helpful. Vishal made slideshows that were easy to follow if I needed help solving a problem. Sometimes the initial explanation of things were confusing but he always would clarify if we asked. Overall, I thought Vishal was very helpful when helping us understand concepts.

- Vishal is an awesome TA, always explains everything very clearly and responds to emails very promptly
- the only suggestion I would have is to try entering/returning grades and assignments back earlier.

① This discussion is super helpful. Our ta always make useful slides on every discussion times which is super good. ~~This~~ These slides covers most of the information we need to know and it can help us prepare well for each tests.

② Vishal is super helpful. He is a good ta.

For the most part discussion was good, I think at times we struggled to cover everything that was planned, which led to a rush to finish material sometimes, or leaving us not enough time for the quiz. But other than that Vishal seemed well prepared and on-topic.

I really like the structure of the discussion and how the teacher goes over the work done in lecture with a worksheet filled with examples. The only thing that I would really change is the way that class can sometimes run way over the limit but I get that the TA's have so much to cover in a very limited amount of time.

The worksheets and test review slides he provided were very helpful. Sometimes felt a bit unstructured but that could have been because of the main course. Overall, a good discussion that helped me with the class a great deal.

- General organization:
  - Not bad but some quizzes felt rushed
  - Make sure everybody has a handout before starting (mostly good, occasional problem)
  - Definitely improved in later discussions, lots of material covered in a short period of time
- Clarity of explanation:
  - Improved with time
  - Presented incorrect information in stem and leaf plot of discussion
  - Exam review was excellent
- General helpfulness:
  - Wouldn't know about office hours and appointments, never had time to go
  - Responsive to questions during class

Discussion was very helpful. Vishal always explained content very clearly and efficiently. Discussion worksheets were also very helpful in getting extra practice time to apply concepts with TA's help. Really, really appreciated the review slides Vishal would always put together before any exam, those were extremely helpful.

TA was very helpful when any questions were asked of him. Sometimes discussion sections felt rushed. This is probably just a result of the meeting times being only 50 mins.

I liked going over the worksheets in class and going step by step. I feel in math it is important to understand each step and go slow. The slideshows were sometimes hard to see with all of the information in them. If they were spaced out a bit that would be helpful.

The discussion sections were generally organized with slide and powerpoint presentations. My TA was available for office hours. I found myself to be a bit confused often, and Vishal attempted to help clarify, but one way to improve overall understanding of the content would be to take more time to go over issues and make sure we all understand.
